ABOUT

Self-starting and resourceful software engineer with experience implementing production level front-end and back-end code. Astute and always-learning designer of user interactions on websites and databases that are sound, scalable, and easy to use. Proven problem-solver with solid grounding in data-driven applications and concepts. Communicates clearly with technical and non-technical team members and promotes drive for customer satisfaction.

EXPERIENCE

NCINO | JAN 2022 - PRESENT
Associate Software Engineer
- Building back-end services to save and retrieve client data within Salesforce
- Creating front-end custom web components to meet UI/UX Team visual specifications and product team functional requirements
- Designing and writing a variety of API exposures to provide more accessible use of platform services
- Created and launched intuitive client-facing documentation
- Demoing recently completed features to stakeholders in regular sprint reviews
- Taking ownership of collateral management features from planning and development to release

Software Engineer Intern
- Worked with Fintech Scrum team implementing new cloud-based SaaS features
- Authored technical design documentation that fully defines all application code and the underlying methodology for the design decisions made

WANDER | MAR 2021 - NOV 2021
Full Stack Development Intern
- Worked alongside the development team to create a cohesive B2B mapping application (including trails, informational guides, and more) on both web and mobile devices using React JS and Docker
- Wrote production-ready code with fluency in front-end and back-end frameworks
- Wrote and utilized automated tests to test the functionality of the web application using Cypress

BOOSTABILITY | FEB 2016 - OCT 2020
Onsite Recommendation Specialist | Feb 2016 - Oct 2020
- Optimized meta titles, descriptions, <H1> , <H2>, and alt-image tags on client webpages based on current best SEO practices
- Interacted, collaborated, and organized meetings with cross-functional teams to determine user requirements and streamline the QA process

Keyword Research Analyst | Mar 2017 - Feb 2018

SEO Fulfillment Specialist | Feb 2016 - Mar 2017

AUTO ALERT | FEB 2013 - JUN 2013
Data Research Analyst
- Tested software to assist dealerships in the organization and maintenance of client data
- Created documentation aiding other analysts to test future software releases

PROJECTS

TOWER MEDIA | 2021
Software Development Consultant

- Developed the time localization functionality for the messaging feature on Clubhouse, an audio-based social media application
- Designed complete solution architecture tailored to specific end-user needs
- Revised, modularized and updated old code bases to modern development standards, reducing operating costs and improving functionality

EDUCATION

BACHELOR OF SCIENCE, MAJOR IN COMPUTER SCIENCE

Utah Valley University | Jun 2019 - May 2023
- *Building an Assembler, Compiler, and Virtual Machine using C++*
